

Investnet Environmental Metrics

At Investnet, we believe in being a positive economic force, a responsible citizen in our communities and a mindful steward of the resources we consume. Investnet is committed to integrating environmental, social and governance factors into our business to help create long-term value for our shareholders, employees and the communities in which we operate.

Tracking our greenhouse gas emissions and total energy consumption are foundational steps in this process. For 2022, all business units of Investnet are included in the GHG emissions calculations for scope 1, scope 2 and the noted scope 3 categories.

	GHG Emissions (tCO₂e)
	2022
Scope 1	133
Scope 2 (location-based)	3,556
Scope 2 (market-based)	3,556
Scope 3 ¹	6,427
Total Measured GHG Emissions	10,116

	Energy Consumption (MWh)
	2022
Total Energy Consumption	8,664

¹ Scope 3 emissions include: category 1 purchased goods and services (data center energy consumption); category 6 business travel (U.S. booked air, rail, rental car, and hotel stays); category 7 employee commuting (home office energy use); and category 13 downstream leased assets (office locations).
